The screenshot displays the 'Create Desktop Policy' (创建云桌面策略) configuration page in a cloud management platform. The interface includes a sidebar with navigation options like 'Home' (首页) and 'Cloud Desktop Management' (云桌面管理). The main content area shows various settings for the policy, including:

- 应用主机系统盘 (GB): 40
- 应用主机CPU占比: 50%
- 应用主机内存占比: 25%
- 应用主机本地盘占比: 0%

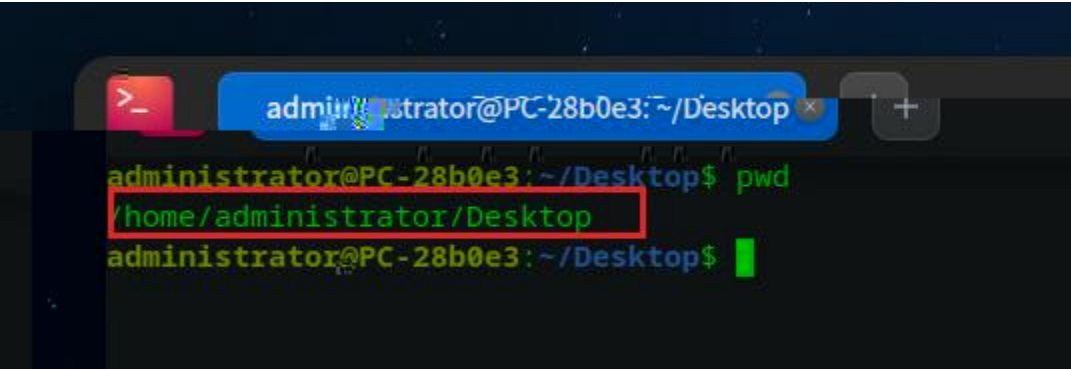

Below these settings, there is a section for 'Peripheral Policy' (外设策略) with a bar chart showing 0% usage. The chart has a vertical axis from 0% to 50% and a horizontal axis for the policy type. A legend indicates '外设策略' (Peripheral Policy) is currently at 0%.
